

STOP A GRIND

Skateboard Solutions

Series 100 Railing Stop Product Information

Our small & durable handrail skateboard deterrents are easily mounted with two pop rivets or screws. They can be mounted on any size round, oval, and square surface at no additional cost to you. Stopagrind's skateboard deterrents are completely rounded, and debured to eliminate any annoyances to the general public. Unlike our competitors, Stopagrind's skateboard deterrents are machined from a solid block of aluminum. This gives you a strong, clean, customizable, and nonpitted product. We also have an anodized coating option if you are looking for a particular color or finish.

Product Specs:

- ALUM. 6061
- Length 2.7"
- Width 1.0"
- Height 1.0"

INSTALLATION AS SIMPLE AS 123

- Use a chalk line to ensure the stops are straight in line with each other on the railing. This is for cosmetics.
- Place the series 100 stop on the railing and drill two holes for the 3/16" stainless steel pop rivets.
- Fasten the series 100 stop down with the pop rivets provided.
